## I Love My Bible!

Over the years, through many stormy moments, I've worn out several of them. Like my most precious photo album, I like to slowly look through pages with my notes God has blessed me so personally with.

But at the same time, I'm surrounded by youth that have never known a world without technology and its deluge of information, both good and bad. We must show from scripture that God is the Giver of technology, and that we must look to scripture as the pinnacle 'how-to' manual for safe optimum use of computers, smartphones, ipads and all the rest. No matter how advanced we think man's inventions might be, God's inspired word is always light-years ahead of it all.

Whether it's kitchen tools, shop tools, sports tools, or tools for computing and communication, we must encourage those around us to always look to scripture FIRST. Mat 6:33.

Would you believe the Bible even teaches us advanced ways of doing Google power searches? It does... really!

2Timothy 3:16, 17 promises us that God's word, whether printed or on line, is fully capable and ready to guide us.

To help others get into God's word, enjoy the attached puzzle. Find the key word in the verse reference, and then search the puzzle for the key word that is usually associated with a computer system.

Technology and Scripture go together PERFECTLY.
